How to Get Your Knowledge Ready For AI

ScreenSteps

Scope of today's discussion

- Answering employee and customer questions

- Helping them solve problems

- Helping them complete tasks
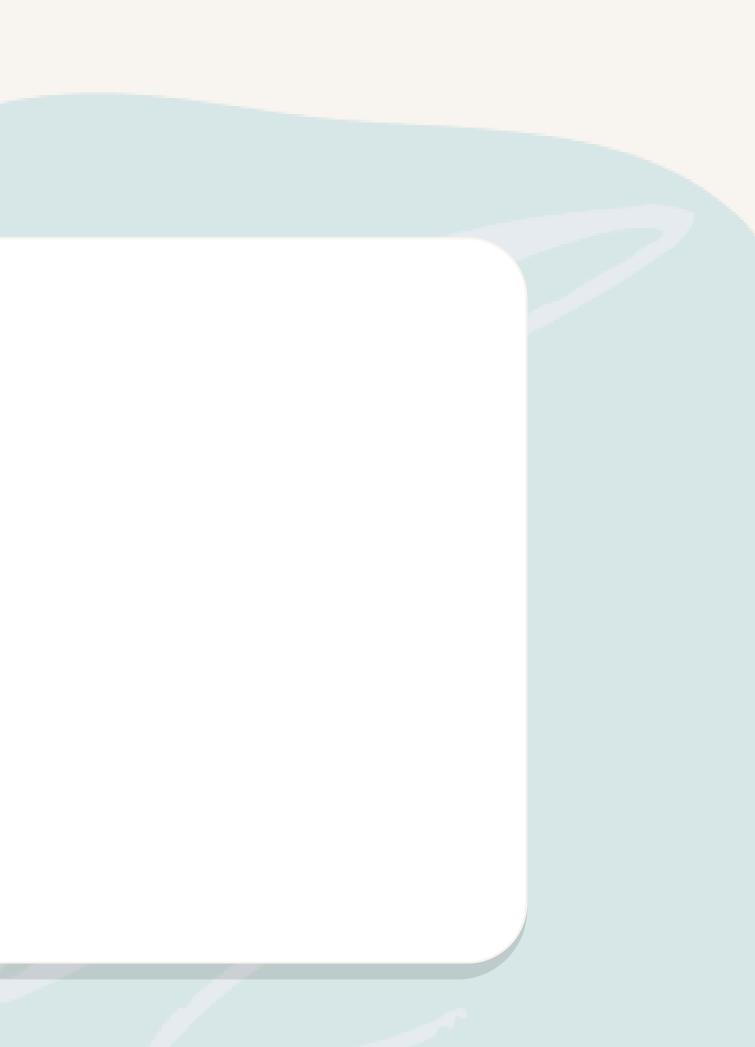

- Helping them learn faster

AI ≠ Magic

AI ≠ Magic

Painful Examples

What is AI really good at?

Examples

- AI Coding

- Google Notebook LM

What are the keys to the knowledge you provide to AI?

- Human readable

- Recipe-rich

- Validated by humans

"But What About Change!!?"

How to get ready

What are the steps

- Turn content into recipes

- Identify gaps

- Review for completeness and accuracy

Basically, you need to be doing the things that you should have been doing all along

The Solution:
Use AI to get ready for AI

How we use AI to get ready for AI

- Use AI to turn content into recipes

- Use AI to identify gaps

- Use AI to fill the gaps

- It is now easier for a human to review
